

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

How might we predict if someone has a heart disease?

Brainstorm

Write down any ideas that come to mind that address your problem statement.

① 10 minutes

Aneerudh M		Mahesh Aravind V			Arun M		
Use Machine Learning Algorithms	MERN stack	Create interactive dashboard using Python		Account creation to save results for later use	Find more datasets		Table to show normal range of HR, BP and Cholesterol
Sending results to the user's email	Provide a list of renowned cardiologists	FAQs section		Use Django/ Flask	Perform data exploration for better understanding		MEAN stack
Use Tableau Dashboard	Provide worldwide and weekly mortality reports	Provide risk factors for cardiac arrest		List treatment options	List reputed scan centres		Latest news regarding cardiology

Prithika S

Java Stack

ava Stack

Provide indepth analysis of results

List heart disease

List the causes of the various types of heart

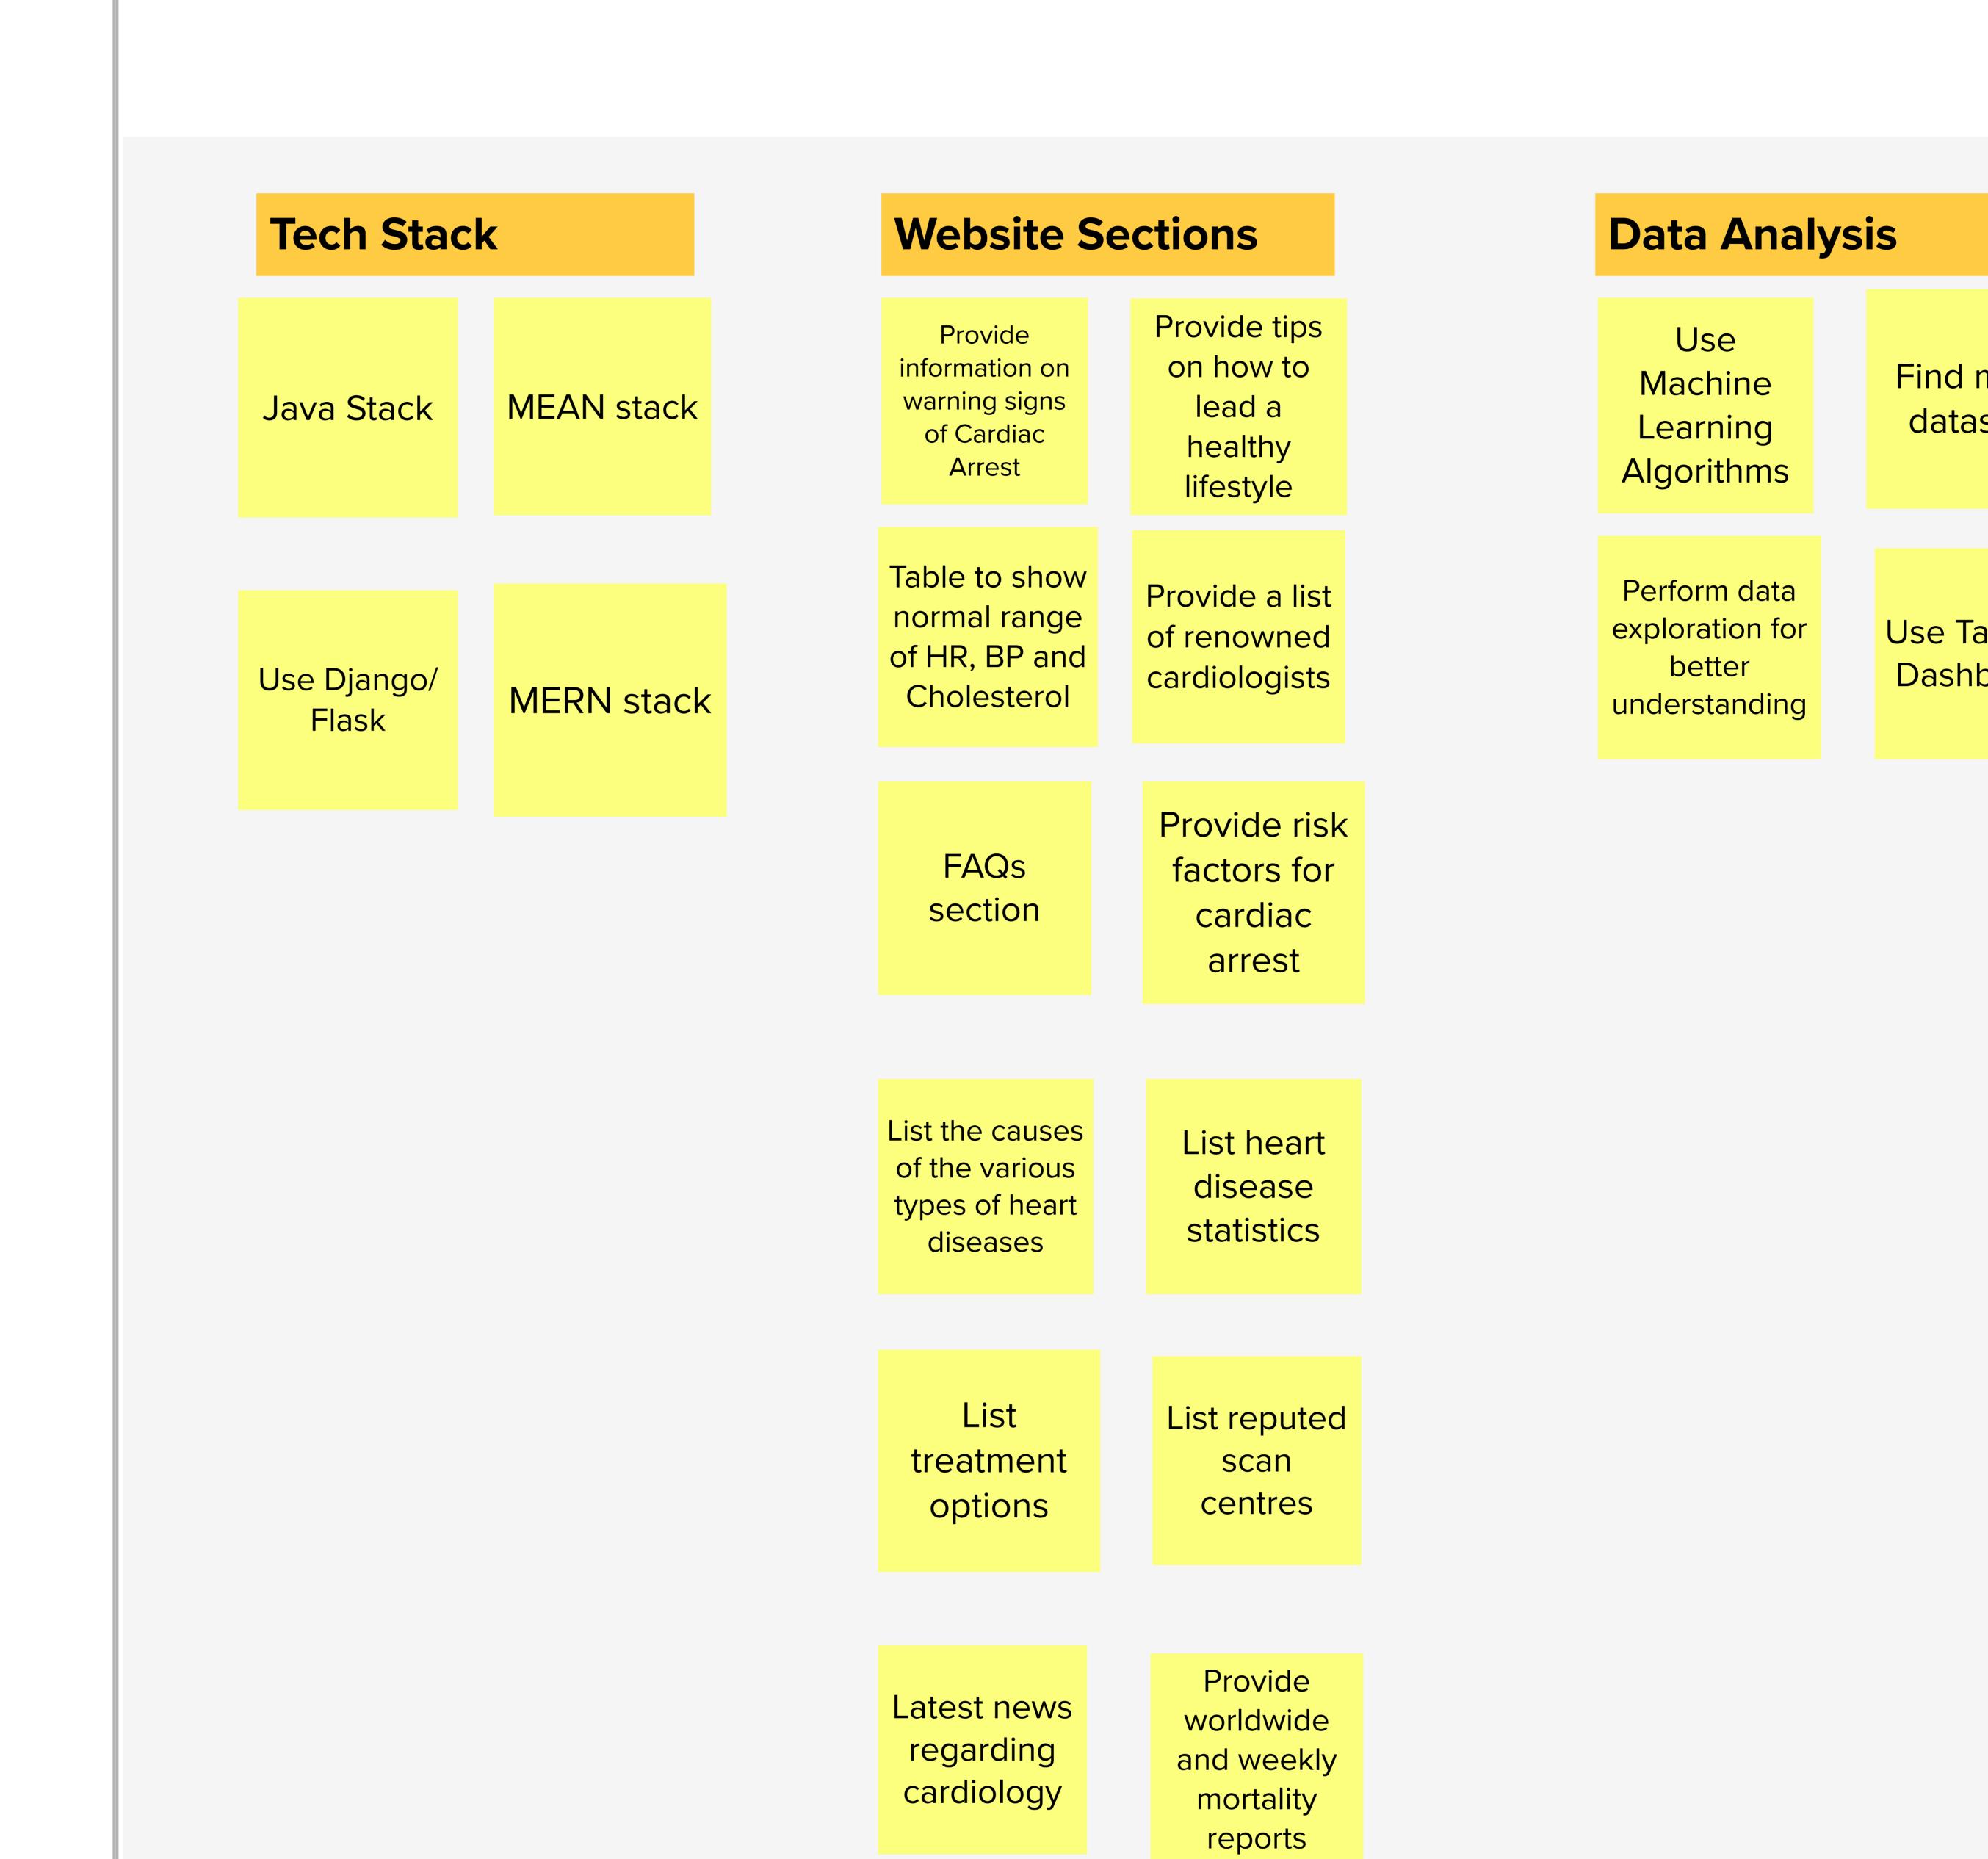

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger

than six sticky notes, try and see if you and break it up into smaller sub-groups.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

① 20 minutes

Feasibility

Regardless of their importance, which tasks are more easible than others? (Cost. time, effort, complexity, etc.)
